REMARKS

This is UNEVALUATED Information

25X1

Between 1 March and 13 April 1955, a garage type building was under construction in the billeting area in the southeastern corner of Merseburg airfield, parallel to Lauchstaedter Strasse. A brick shed was built north of the garage. The course of the board fence had changed when compared with previous observations.

Comment. These statements agree with previous information. For layout sketch of billeting area, see Annex. The information on the area of the officers billets north of the vinegar factory, the brick sheds south of the vinegar factory, the garages parallel to Lauchstaedter Strasse, near the main guardhouse, and the present course of the board fence with the side entrance at the road through the camp is received for the first time.
